Area Cooling Solutions

Since 2010, Area Cooling Solutions has developed a different and innovative range of condensing units, perfectly adapted to any commercial or industrial refrigeration application.

The entire range of AREA condensing units is designed and manufactured in Europe. Our condensing units meet the highest European standards, and they are being TÜV certified.

We offer the most complete range on the market in low temperature (LP) and medium/high temperature (MHP) applications.

The units can operate under any climate - even in the hottest tropical conditions, with conventional refrigerants, type R448A, R449A, R513A, R134a, A2L (R455A and R454C) and natural refrigerant CO₂(R744).

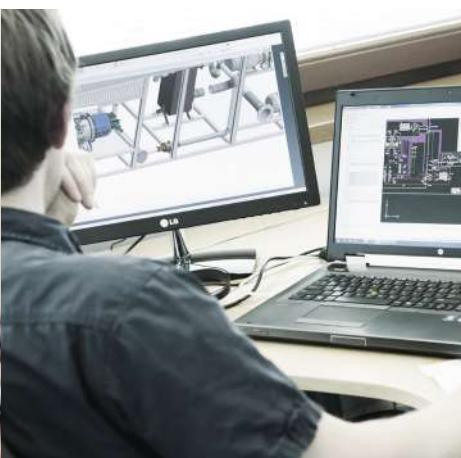

Our condensing units combine both tradition and innovation. In order to guarantee the greatest reliability and durability of your installation, AREA

condensing units have kept the traditional principles of a refrigeration circuit, offering oil separators, suction accumulator, metal housing, phase controllers, etc on all our units (option or series).

Energy savings, low noise levels and integration of the units into the urban environment are the essence of our innovations.

Thus, we were among the first to offer a plug&play inverter condensing units, to use advanced technologies, such as large diameter EC fans (low noise level of our units), Panasonic scroll inverter hermetic compressors or rotary inverter compressors with liquid injection.

Choosing an AREA condensing unit is the guarantee of an efficient and successful installation for any commercial refrigeration application, such as petrol stations, convenience stores, butcheries, bakeries, ice machines, cold rooms, milk tanks, restaurants, hotels, catering, kitchens etc.

We are AREA, the HVAC and Refrigeration Company

Multilingual, native speaker team

Design and production in the EU

Technical support Field/Online

Application expertise

Spare parts management

areaacademy
Online/Offline training

Since 1986 @ your side for HVAC and Refrigeration projects

We understand your business, and provide you with the best solutions for your new shop.

Designed and manufactured in the EU

Smart Solutions for a Green Future

Calculation Software

Area Cooling Solutions is pleased to announce the launch of our Calculation Software.

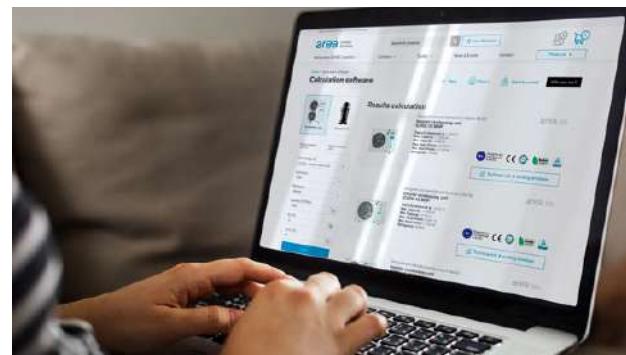

Select your product in the easiest way with our new online tool. You can search either by Capacity or by a Specific Product line. You can consult the Technical Information and the Working Envelopes, and you also can print or share the configuration you have made with whoever you wish.

In this way, you will simplify the selection process and will be able to find what fits your needs.

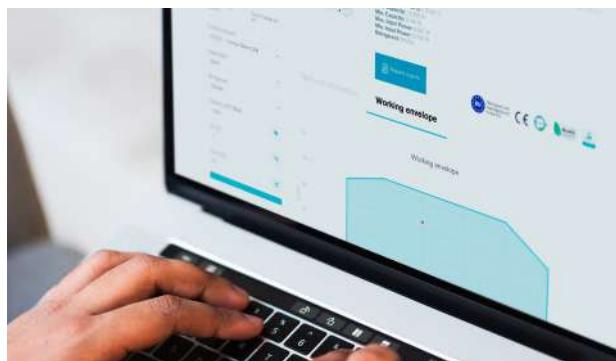

Specify your needs on the form

Search forms based on product type, capacity or model/unit.

Select your product from result

You will get a result list with the products that fit your needs.

Consult technical information

You will be able to consult the technical information and working envelopes of these products.

Share it!

You can also print or share the configuration you have made with others.

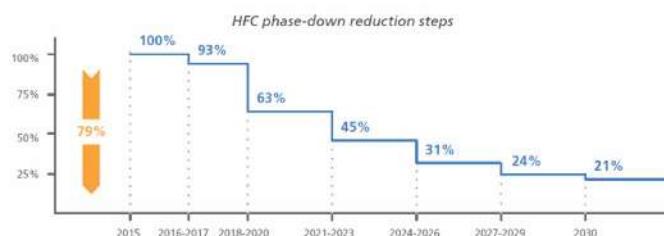

F-Gas for commercial refrigeration

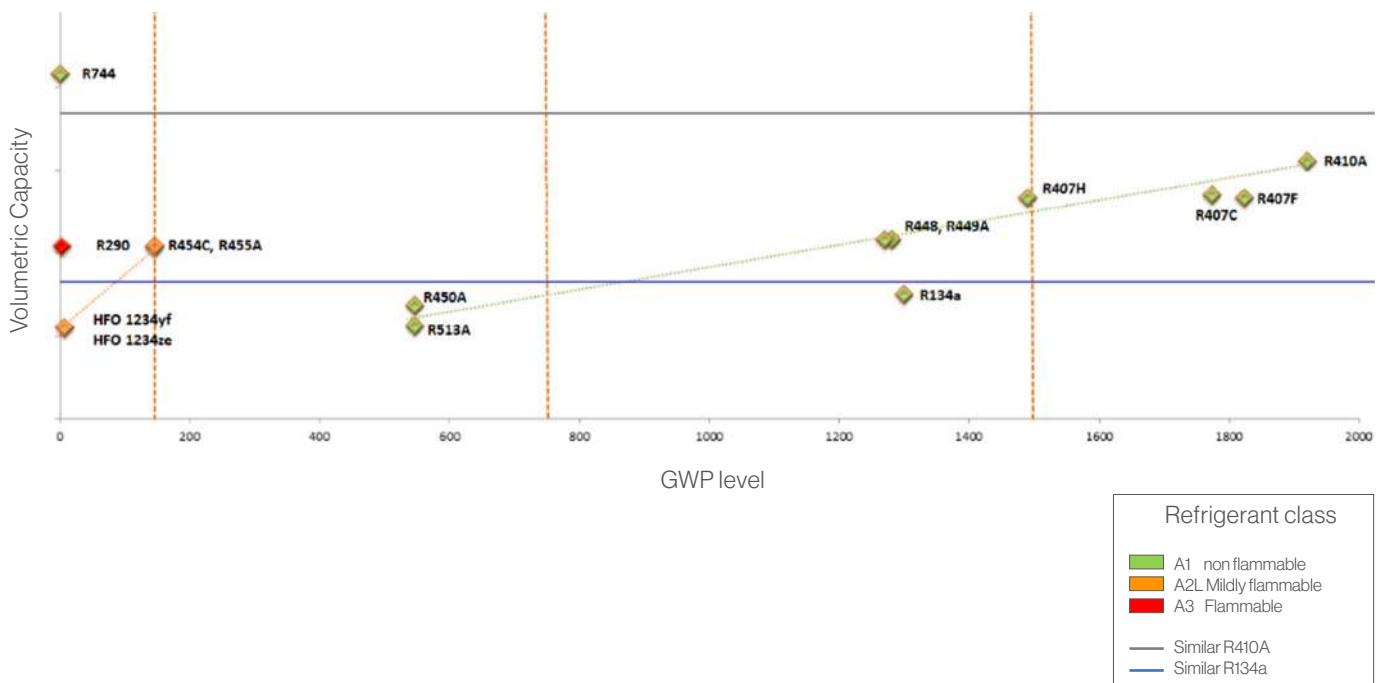

1. From 1 January 2020

Stationary refrigeration equipment, only can use HFCs with GWP \leq 2500 (except temperatures below – 50 °C)

'Stationary' means not normally in transit during operation, for example, a condensing unit for cold room.

The HFC's are affected by phase-down, so their use will be less and less in the coming years

Area Solutions for F-Gas

Family	Range kW -10°C/32°C	Range kW -30°C/32°C	Refrigerant	Limit Charge (kg)	Stationary refrigeration	Centralized Refrigeration Systems ≤ 40kW	Centralized Refrigeration Systems ≥ 40kW
BASICLine	1.7 - 9.0	0.6 - 5.0	R448A, R449A, R134a, R513A, R410A	No limit			
Silent HFC	4.0 - 22.0	2.7 - 6.0	R448A, R449A, R134a, R513A, R410A, R407C	No limit			
Silent A2L	0.5 - 9.0		R454C, R455A	11.43 (10.84)			
iCOOL HFC/HFO	0.5 - 29.0	0.5 - 14.0	R448A, R449A, R134a, R513A, R407C	No limit			Multi-unit**
iCOOL A2L	0.5 - 9.0	tbc	R454C, R455A	11.43 (10.84)			Multi-unit***
iCOOL CO₂	1.7 - 30.0	1.7 - 10.0	R744	No limit			Multi-unit***
iCOOL LOOP A1	1.1 - 6.3	tbc	R448A, R449A	No limit*			Multi-unit**
iCOOL LOOP A3	5.0	tbc	R290	0.5			Multi-unit***

The limit charge is defined by EN-378, according to public access and CU in unoccupied space, except water loop systems (public access and CU in occupied space). Using specific safety measures (such as an extra ventilation system), charge of A2L and A3 can be increased.

* A calculation must be done, toxicity limit x room volume. But in practice, there is no limitation for the use of iCOOL LOOP A1, due to the capacity of the unit.

** The match of the capacity (40 kW) and the GWP limit is defined for individual circuit. Therefore, it is allowed to use multi-unit solution if every circuit does not exceed the norm limit. For example, for 60 kW, it is possible to use two independent units of 30 kW each charged with A1 refrigerant.

*** For applications of more than 40 kW where GWP<150 is mandatory, AREA is offering a multi-unit application to reach the total capacity. The higher reliability and the easier installation are the two main advantages of such a solution.

The Ultimate Solution

iCOOL is the modular solution of inverter condensing unit that saves you time during installation and commissioning, as the unit is factory customized to your needs. Thanks to its large modulation capacity and its multi-refrigerant compliance, it can be used for any commercial refrigeration application providing service down to a minimum of 500W for a single evaporator.

The new remote control based on specific software ensures high uptime and reliability.

With a very simple user interface, low energy consumption, fast commissioning and easy maintenance, iCOOL by Area Cooling Solutions is the perfect solution for convenience stores, restaurant cold rooms, fuel stations, food stores, milk cooling and ice making equipment.

iCOOL, Different by Nature

iCOOL is the modular solution of inverter condensing unit that saves you time during installation and commissioning, as the unit is factory customized to your needs. Thanks to its large modulation capacity and its multi-refrigerant compliance, it can be used for any commercial refrigeration application providing service down to a minimum of 500W for a single evaporator.

Easy Selection

- Online selection software
- Hands-on and remote training
- Support to select the best HFC, A2L or CO₂ solution for any application

Easy installation

- Lightweight units
- Integrated options from factory
- Refrigeration design
- Flexible and fast delivery

Easy maintenance

- 180° access to all components
- Express delivery (24h) of spare parts and oil in the EU
- Remote control with ModBus TCP/IP

Easy commissioning

- Less than 3 minutes
- Multilingual assistance
- 100% functionally tested
- Active control option

Advanced control:

- Simple user interface
- Smooth start and stop function
- Working envelope control
- Oil return function
- Condenser cleaner (Option)
- Remote control via AreaCloud

iCOOL A2L is the latest development of the successful iCOOL range designed and manufactured in Europe by AREA.

Already existing in conventional refrigerant (HFC/HFO-A1) and natural refrigerant (CO_2), the iCOOL family is expanding with a new range designed to be used with A2L refrigerant like R454C/R455A (GWP < 150) in compliance with EN 378-2:2016.

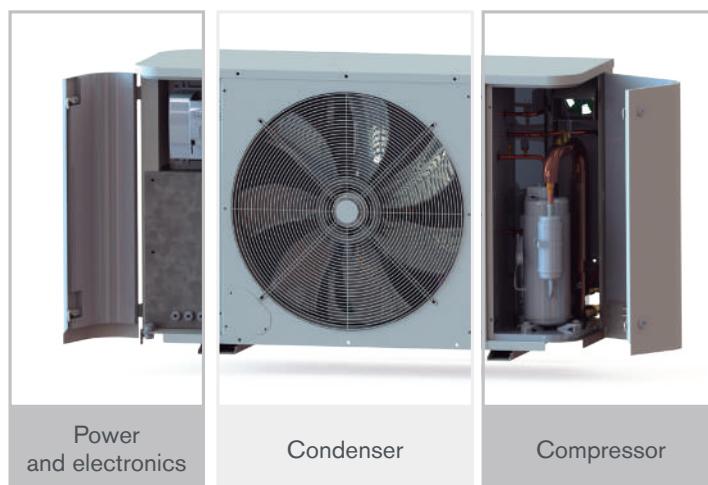

With iCOOL A2L, we improve iCOOL benefits to push forward standards:

- Higher energy savings and wider capacity modulation (15% to 100%), thanks to the use of a new BLDC compressor.
- More silent, thanks to the use of a larger EC fan and special sound-proof chamber for compressor
- Enhanced safety for A2L charge, thanks to the **3 isolated chambers** allowing independent access to power and electronics, condenser, and compressor.

And we keep the features that makes the success of the iCOOL range:

- Easy installation, plug&play compact unit.
- Easy commissioning, start-up guaranteed in less than 3 minutes.
- High reliability, customized control to protect the compressor.

3 isolated chambers

Sustainability is a core value of AREA, iCOOL A2L is designed to help retailers in the **food sector, food service and cold storage segments** comply with F-Gas on time.

eSLIM Silent Inverter Condensing Unit

High-Medium temperature,
380/420 V - 3ph - 50 Hz

Silent

State-of-the-art design
for low noise units

**Smart Solutions
for a Green Future**

Designed and
manufactured
in the EU

Silent

State-of-the-art design for low noise units

Silent is a range of plug&play compact units that are designed with separate spaces for the condenser and compressor. To achieve the lowest possible noise, quiet compressors with additional acoustic insulation are used. The condenser space has a built-in energy saving EC fan with a reduced noise level. They are designed to work at external temperatures of up to + 43 °C.

These units are designed to work with refrigerants: R448A, R449A, R134a, R513A, R407C, and R407F.

As a very quiet solution, Silent units are the perfect solution where noise is an issue during night and day, like the city centre.

Several options are available directly assembled in our factory, to achieve a faster and easier installation.

Silent by Area Cooling Solutions is the low noise solution for convenience stores, restaurants cold rooms, fuel stations, food stores, milk cooling and ice making equipment.

BASICLine

Classic on/off Plug&Play Units

The condensing units of the BASICLine series have an optimized design allowing them to ensure minimal size and weight. It has a compact design with separate spaces for the condenser and compressor along with other system components. BASICLine units are manufactured in two housing sizes.

These units are designed to work with refrigerants: R448A, R449A, R134a, R513A, and R407C.

These compact devices are ideal for small shops, restaurants, fish markets, butcher shops, gas stations, bakeries etc.

BASICLine Condensing Units

Search engine of cross references

Check out our website to find our calculation software and a complete list of all updated equivalent products

areacooling.com offers you a tool to do a quick search on our equivalent catalogue by product model of brands

The screenshot shows the website's header with the area logo and navigation links for Deutsch, Italiano, Polski, Français, Español, and English. Below the header is a search bar with the placeholder "Search for products" and a "Cross References" button. Further down are dropdown menus for "Refrigeration & HVAC products", "Company", "Quality", and "News & Events", along with a "Contact" link and a "Price List" button.

- 1 Click on cross references search engine

The screenshot shows a woman in a supermarket aisle looking at a screen displaying search results for a product. The results list several models, each with a small image, the model name, and a list of equivalent brands and models. The background shows shelves stocked with various products.

- 2 Search for a model

- 3 Find your equivalent

The screenshot shows a product page for the SAPTXSs-10 condensing unit. It features a large image of the unit, technical specifications, and a call-to-action button to check availability. The page also includes icons for "Made in Europe", "Inverter Technology", and various compliance logos like CE, RoHS, and ISO.

- 4 Consult our product

- 5 Or contact our customer service

The footer contains several sections: "Evolving with you" (Enhanced technical support for your projects), "Helping you" (Reach us via web, phone, mail chat & videoconferencing), "International Team" (14 nationalities in European Terms), and "4 warehouse in Europe" (Increased stock availability). It also includes the company's address in Valencia, Spain, and contact information for sales and technical support.

Sales conditions

General terms and conditions of Area Cooling Solutions Sp. z o.o sale

These General Terms and Conditions of Sale shall be applied to sales of goods, components of goods, or services (jointly referred to as the "Products") by Area Traders Sp. z o.o., with its registered office in Nowa Wieś Wrocawska, Poland, hereinafter referred to as the "Seller" or "Area". Sales of a Product shall be understood to mean any legal relation pursuant to which the Seller transfers onto the customer (the "Buyer") the ownership of goods or a component of goods or provides services. These General Terms and Conditions of Sale shall be binding on both the Seller and the Buyer. The Seller shall not be bound any general terms and conditions of agreements (including rules or templates of agreements) set forth by the Buyer unless such terms and conditions have been accepted by the Seller in writing. The above-mentioned general terms of the Buyer's agreement shall not be binding on the Seller, even if the Seller has not raised a separate objection towards such conditions. In the event where the Products are purchased by a consumer, these General Terms and Conditions of Sale shall be applied in compliance with the specific provisions governing consumer sales.

1 Conclusion of Sales Agreement

- 1.1** A Product purchase offer that has been submitted by the Buyer shall include: marking of the Buyer, the object of an order, i.e. the name and the catalogue number of the Product (in case of any discrepancies, the order shall be executed on the basis of an Area Catalogue number given by the Buyer), the number of pieces of the Product with individual catalogue numbers, the net unit price and the total price, an expected delivery date, the delivery venue, any additional remarks, a signature of a person authorized to submit an offer.
- 1.2** A Product purchase offer submitted by the Buyer shall be accepted by Area once the Buyer has received a written statement by Area about its acceptance. A confirmation statement that has been automatically sent to the Buyer by electronic mail shall be considered as a written confirmation by Area, too.
- 1.3** In the case whereby the data in the Order do not match the current offer, the price list, the terms of product delivery by suppliers, delivery execution dates, etc., Area shall send the Order confirmation with the Order data that have been adjusted accordingly. After the Buyer has accepted such modification of the Order, the modified Order shall become the basis for the execution of the delivery of the Products specified therein.
- 1.4** In the event whereby Area has submitted a Product sale offer to the Buyer, it shall have to be accepted by the Buyer within a timeframe set forth in the offer to become binding for the Seller. If the offer validity date has not been indicated in the offer, such a timeframe shall amount to 30 days.

2 Delivery and Transfer of Risk

- 2.1** Unless provided otherwise, the warehouse of Area located in its registered office shall be the delivery venue of the Products sold by Area (hereinafter: the "Delivery Venue").
- 2.2** The Seller shall be authorized to effect partial deliveries of the Product.
- 2.3** Product deliveries shall be executed at dates agreed by the Parties. The delivery shall be considered as completed once the Product has been delivered to the place indicated as the Delivery Venue.
- 2.4** The Buyer shall be required to examine the Product immediately after its delivery; complaints concerning the quantity of the Products shall not be considered, if such shortages have not been entered into the delivery document and confirmed by the forwarding agency's representative.
- 2.5** The ownership of the Product, subject to Clause 7, benefits and encumbrances related to the Product and the risk of its accidental loss or accidental deterioration of the Product quality shall pass from the Seller onto the Buyer at the moment of its delivery, prior to offloading of the Product.

3 Delays

The Seller shall not be held liable for damage suffered by the Buyer as a result of the delay in the Product delivery caused by reasons not attributable to the Buyer and, unless it has been explicitly agreed otherwise, the Seller shall not be held liable for contractual penalties payable by the Buyer to its counterparty or for other claims raised by the counterparty against such Buyer due to the delay in the delivery of the Equipment. The Buyer's withdrawal from the agreement due to the delay shall only be permitted upon the Seller's consent.

4 Change in Prices

The Seller reserves itself the right to adjust the agreed prices in case of changes in currency exchange rates, increase in the prices of materials, changes in remuneration, governmental interventions, or other circumstances beyond the control of the Seller.

5 Packaging

- 5.1** Single-use packaging of the Product has been included in the price and shall not be reimbursed; in the event it has been returned to the Seller.
- 5.2** Multi-use packaging has not been included in the price, and its costs shall be settled with the Buyer after undamaged packaging has been returned together with transport costs paid by the Buyer, pursuant to the Seller's instructions.

6 Payment Conditions

- 6.1** Unless it has been agreed otherwise in writing, the Buyer shall be obliged to make a down payment in the amount of 100% of the Product price within 5 business days before the Product delivery date at the latest.
- 6.2** The Buyer shall be entitled to a trade credit exclusively to the extent specifically provided for in the offer, order confirmation, or the invoice.
- 6.3** If the payment has not been executed when due, the Buyer shall pay statutory interest for delay charged as from the payment due date.
- 6.4** The Buyer shall not be entitled to suspend the payment due to the Seller or deduct any claim of the Buyer by netting it off against the Seller's claim, unless the Seller has expressed its consent to such deduction.
- 6.5** In case of there no detailed instructions given, invoices for the Products shall be issued to the Buyer. Any resulting costs incurred by the Seller, including the loss of profit shall be revoiced to the Buyer.

7 Reservation of Rights

- 7.1** The Seller reserves itself the title of ownership to the Products sold until full payment of the price has been made. The ownership title to the Products shall be transferred onto the Buyer once the entire price for the Products has been paid.
- 7.2** Reservation of the ownership title by the Seller shall in no way affect the transfer of risk specified in Clause 2 above.

8 Deductions and Assignment

The Seller shall be authorized to deduct its receivables due from the Buyer against its payables and to make assignments of receivables held against the Buyer onto any entity of its choice.

9 Catalogues, Descriptions, etc.

- 9.1** Information about the Products that is contained in any catalogue, description, brochure, advertising (hereinafter: the "Catalogues") shall not be deemed as the solicitation of an offer within the meaning of the Polish Civil Code, but only as an invitation to place orders. Detailed technical data about the Product that are included in the catalogues are subject to change due to the speed of changes in the technological industry and continued improvement of the products made by Area. Such data are provided for information purposes only and shall be binding only when a specific piece of information has been explicitly indicated in the offer made by Area and/or in the order confirmation sent by Area. Detailed requirements of the Buyer concerning products shall be binding only to the extent in which they have been confirmed by the Seller in writing.

9.2 The Buyer may obtain confirmation of the currently applicable data necessary for placing an order by an authorized employee of Area.

10 Drawings and Descriptions

Any intellectual property and industrial property rights to drawings and technical documentation delivered to the Buyer shall remain the property of the Seller. Drawings, technical documentation, and other technical information shall not be used, copied, reproduced, or disclosed to a third party without the Seller's consent, for any other purpose than the one envisaged at the moment of their delivery.

11 Modifications of Products

The Seller reserves itself the right to make modifications to its Products without notice, if such modifications may be implemented without amending the technical specifications that have been agreed upon.

12 Warranty

12.1 The warranty period shall be 12 months, starting from the Product sale date understood as the invoice issuance date. Pursuant to separate arrangements it may be possible to agree to another warranty period.

12.2 At the Seller's discretion, the Seller undertakes to repair or replace the Products that during the Warranty Period are found defective under examination carried out by the Seller due to manufacturing, design, or material fault. Costs of disassembly and installation of the Product again incurred by the Buyer shall not be reimbursed.

12.3 In the event of occurrence of a Product defect during the Warranty Period, such Product shall be sent by the Buyer to the Seller, at the Buyer's expense and risk, with paid transport and insurance, together with:

- a letter explaining the reason for sending the Product,
- defect report,
- copy of the warranty sheet and the invoice,

The Product shall be sent without unnecessary accessories. Only in the case of compressors they shall be sent with their electronic accessories.

12.4 If the warranty claim is justified, the Seller shall return the repaired Product or a new Product and shall take over the replaced parts or the defective Product. In such an event, the Buyer shall decide about the mode of transport and shall pay for the transport and insurance.

12.5 Area may under a separate order arrive at the venue of equipment installation at the Buyer's expense to its request under a separate offer. In case of equipment, the warranty for which depends on the first start-up by Area and that has been made by Area the costs of such arrival shall be incurred by Area.

12.6 Liability under a guarantee shall be excluded, except for cases whereby under applicable regulations of law exclusion of liability under a guarantee is not allowed.

12.7 In case when a consumer is a Buyer, this warranty does not exclude, or limit, or suspend the consumer's rights provided under the applicable regulations.

12.8 In case when a consumer is a Buyer, and the Product does not match the agreement, the Seller shall at its discretion reimburse the Buyer reasonable costs of disassembly, delivery, labour, materials, and the reinstallation and start-up of the Product and shall perform all the above actions independently or through third persons.

12.9 Special warranty conditions: 3 years warranty for con-densing units: APMXN-3, APTXN-8,5, APTXSs-18 from ex-port invoices: FSE-197/2012/EX and FSE-213/2012/EX.

13 Liability

13.1 Apart from liability towards the Buyer as a consumer arising under the above warranty or from non-compliance of the goods with the agreement, all of the Seller's liability shall be excluded, also including any recourse claims to the extent that it is provided for under Polish regulations of law.

13.2 To the extent in which liability for the Product towards third persons may be imposed on the Seller under applicable regulations of law, the Buyer shall indemnify and hold the Seller harmless to the extent in which the Seller's liability has been limited under these General Terms and Conditions of Sale. The Buyer shall be obliged to appear in the court or the court of arbitration reviewing a claim against the Seller under the damage caused by the Products as a co-participant or an intervener. If a third person has made a claim concerning damage described herein caused to one of the parties of the agreement, such party shall immediately notify the other party accordingly.

14 Complaints

Any claims concerning defects, delays in the delivery, liability for the Products, or other claims for damage shall be made in writing and forwarded by the Buyer to the Seller without undue delay. In case of claims that are subject to the warranty under Clause 12, the Buyer shall be obliged to prove that a defect has occurred within the period specified under Clause 12.

15 Return of Products

15.1 Products may be returned only under a separate agreement between the Parties; only those Products that are fit for sale in undamaged, original packaging may be returned. An invoice number must be quoted for such Products.

15.2 The Buyer shall reimburse the costs of the return transport of the Products to the place indicated by the Seller and the transport insurance costs. In case of return of Products an administrative fee that is from time to time set by the Seller shall be deducted from the price that is subject to reimbursement, however, not less than 5%.

16 Rights to Products

16.1 Further to the Product purchase, the Buyer shall not acquire any intellectual property rights or industrial property rights in the form of licenses, patents, copyright, trademarks or any other intellectual property rights or industrial property rights related to the Products.

16.2 If the Products in their entirety or part involve software, the Buyer shall only acquire a license to use such software to use the Product under its purpose and the instruction manual. The Buyer shall not acquire ownership title or rights of any other type to the software.

17 Force Majeure

The Seller shall be authorized to cancel orders of the Buyer or to transfer the execution date of orders and shall not be held liable for non-delivery, defective or delayed delivery of the Products, entirely or partially, caused by events that are beyond the reasonable control of the Seller, such as social riots, war, fire, public requirements, strike, lockout, slowdown, shortage of transport means, shortage of goods, illness or delay, or defects in the delivery from suppliers, production-related accidents, or inspections, or power shortages. In these cases, the Buyer shall not be authorized to seek damages or other claims against the Seller.

18 Severability

In the event whereby one or more of the provisions of these General Terms and Conditions of Sale are found to be invalid, unlawful, or unenforceable, it shall not affect or limit the validity, lawfulness, or enforceability of any of the remaining provisions.

19 Disputes

Any disputes arising out of or in connection with these General Terms and Conditions of Sale and under the primary contractual relation shall be resolved by Polish laws. Any kind of disputes that might arise shall be resolved by courts competent for the registered office of the Seller.
